

Explore!

Welcome to BOOMTOWN BUILDSM! Your town is growing, and people need more places to live, work, and play. Can you design and create new buildings for your town? What new buildings will you need? Who will use the buildings? How will they be used? What do you need to design and build them? How can you improve on your first ideas?

Create and Test!

Design and build a new town. Use the LEGO[®] DUPLO[®] bridge, the mat, and other pieces from the STEAM Park set to help you. Show your ideas for how to include places to live, work, and play. Test ways to improve on your buildings as you go.

Share!

Record your ideas and designs in your Engineering Notebook. Use it and your town buildings to share what you have learned from others. Participate in the celebration event, invite your family and friends to a special team meeting.

Most of all... **Have Fun!**
